National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

Describe present and historic physical appearance.

The Essex Club, located at 52 Park Place, across from the eastern edge of Military Park, is a 3 bay, 5 story, English Georgian influenced brick and cast stone club building. Designed and constructed in 1926 by the locally noted firm of Guilbert and Betelle, the structure serves as the clubhouse for the Essex Club, the oldest existing business club in Newark, founded in 1876. Maintained as originally designed, the Club's interior decorative features include classical architectural mouldings, ornate lighting fixtures, paintings, sculptures and antiques. Formal dining rooms, lounges, private bedroom suites and squash courts are some of the executive amenities offered by the Club.

The three bay, five story, symmetrically designed facade is characterized by a tri-partite division of spaces into base, body and attic (Photo 2). The first floor base of the building consists of a cut stone base and a rusticated coursed cut stone wall surmounted by a Greek key incised belt course. The main entrance, located in the center bay of the rusticated base is composed of paired Doric columns supporting an entry porch with an entablature of a dentillated architrave, blank frieze and mutule-supported cornice. The six panelled paired wooden entrance doors are surmounted by a leaded fanlight. The 8/8 flanking single windows have flat rusticated lintels, stone sills and "S"-scrolled decorative iron grates. The body and attic of the building are laid in Flemish bond brick with cut stone quoins.

The second and third stories, forming the body of the building, have the most elaborate surface ornamentation. The second floor windows feature shouldered stone architraves, lintel entablatures with keystone female masks and semi-circular iron balconies. The center window is ornamented by a keystone bearded male mask and a bracket-supported segmentally arched broken pediment decorated with a

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 2

Essex Club, Newark, Essex County, NJ

central festooned cartouche and a rectangular monogrammed iron balcony. All the second floor windows feature 12/12 double hung wood sash. The 8/8 third floor windows feature shouldered stone architraves with scrolled window pediments.

The attic of the structure is separated from the body by a narrow decorative stone belt course which also serves as the sill for the fourth floor windows. The windows are further decorated with flat gauged brick arches with a limestone keystone flanked by a single limestone voussoir. The fifth floor 8/8 windows have flat gauged brick lintels with protruding brick keystones and stone sills.

The entablature is composed of a moulded architrave, dentillated and egg-and-dart ornamented frieze and a modillion-supported cornice. The structure is surmounted by a cast stone roof balustrade of recessed panels alternating with balusters. An iron flagpole, used for the exhibition of the Club standard, is attached to the facade above the second floor center bay broken pediment.

The structure is irregular in plan, following the "L"-shape of the narrow lot. The short leg of the "L" forms the front of the building on Park Place; the long leg of the "L" forms the eastern rectangular extension of the structure. Although the facade of the structure is attached to the adjoining buildings on the north and the south, the long leg of the "L" has been set back from the southern lot line to allow an alley which serves to illuminate the south side of the structure flooding the interior with natural light. The alley begins behind the main stairwell, illuminating it with light from the southeast through its three story window grouping.

Interior

The building is entered through paired entrance doors into a small foyer which leads to the lobby through French doors. On either side of the vestibule, facing the front of the building, are offices. To the north of the lobby is the coat room. The rectangular lobby (Photo 3) opens up to the south to reveal an open suspended semi-circular staircase illuminated by a four sash casement window on three floors, creating an atrium effect (Photo 4). To the north of the staircase a corridor turns a ninety-degree angle to the east

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 3 Essex Club, Newark, Essex County, NJ

leading to the rectangular extension of the building where the "Grill" or "tap room" (Photo 6) and its associated kitchen and storage areas are located. A rear corridor leads to a service elevator and back staircase.

The suspended staircase leads to the grand second floor public rooms of the clubhouse (Photo 8). A large hall opens on the west to the "library" or "lounge" area which features rich mahogany paneling with intricately carved door surrounds and entablature, and a massive fireplace on the south wall (Photo 7). To the east is the main dining room also finished in wood paneling, although painted, an ornate plaster ceiling, and a fireplace on the north wall (Photo 5). Behind (to the east) the dining room are the kitchen and storage areas. Two dumbwaiters connect the main kitchen with the other floors.

The third floor contains the large "Essex Room" at the west end of the building as well as five function rooms of various sizes connected by a corridor along the north wall. A service pantry, restrooms and storage areas are also located on this level.

The fourth floor contains two large bedroom suites in the front of the building and eight bedroom suites in the rectangular extension to the east. Each bedroom suite consists of a bedroom, a large closet and a bath. The two largest bedroom suits at the front of the building also contain living rooms. All bedrooms open onto an "L" shaped corridor along the north wall and between the eastern rectangular extension of the structure and the front section of the building.

The fifth floor contains two large bedroom suites at the front of the building. The rectangular eastern section of the structure contains a single bedroom suite, a squash lounge with dressing room, a shower and toilet room, two tournament sized squash courts and a locker room.

The sixth floor, also known as the mechanical room penthouse, contains the mechanical room, a small lounge and a gallery from which one can observe the squash courts below and the upper courts (Photo 9). Access to the roof is provided through a door in the west wall of the mechanical room.

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 4 Essex Club, Newark, Essex County, NJ

The clubhouse is in relatively good condition and has retained a very high level of integrity. Most of the interior finishes are intact with some exceptions. These are: the painted wood paneled walls and the acoustical tile ceiling fit around the plaster ceiling medallions in the main dining room. Original interior finishes include plaster walls, ceiling, mouldings (crown, chair rail and baseboard), paneled wood doors and their surrounds, random width pegged wood plank floors underneath carpeting and original fixtures and hardware.

The site of the building is located on the east side of Park Place, Block 125, Lot 13. The property dimensions are 40.29' (west) x 175.37' (north) x 43.14' (east) x 32.53', 68.42', 9.92', and 67.20' (irregular southern boundary). The total area is .183 acre.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

The Essex Club is significant architecturally as one of the best examples of the English Georgian influence used on a commercial building in Newark (Criterion C). Designed by the prominent architectural firm of Guilbert and Betelle, the design of the Essex Club is in keeping with the traditional, conservative nature of the Club. Occupying a prominent position on Military Park, the city's "Middle Commons," the club is part of a streetscape which includes such notable buildings as the Robert Treat Hotel immediately to the north and the Military Park Building, a 21 story Art Moderne office building occupying the southern corner of the block (Photo 1). The Essex Club also faces Gutzon Borglum's large scale bronze monument "Wars of America," Borglum's largest sculpture after Mount Rushmore. The structure is also significant in the area of Social History as the club house of the Essex Club, the oldest businessmen's club in Newark, in continuous existence since 1876 (Criterion A).

In both design and workmanship, the Essex Club is indicative of the high quality of commercial architecture built in Newark in the 1920s, a period of growth and expansion for the city. Construction of the Essex Club was part of the 1920s post-war building boom which celebrated Newark's success as the largest and richest city in New Jersey. During this period of seemingly endless prosperity, Newark's famous skyline and downtown were created, including its major twentieth century landmarks, such as the Newark Museum, the Firemen's Insurance Company, Essex County Hall of Records, New Jersey Telephone Company, the 34 story Raymond-Commerce Building, the 35 story National Newark Building and Newark Airport (Cunningham 1966: 274).

See continuation sheet

United States Department of the Interior
National Park ServiceNational Register of Historic Places
Continuation SheetSection number 8 Page 2 Essex Club, Newark, Essex County, NJ

The new Essex Club building replaced the previous club house, a converted wood frame residential building, in the same location on the park. Newark's social and business leaders clustered near the parks, as they had been doing since the nineteenth century. Before World War I, leading families such as the Ballantine and Wards lived in mansions fronting on either Military Park or Washington Park (Cunningham 1966: 242). The post-war building boom gradually replaced the lavish residences with elegant commercial structures around the perimeters of the parks. The construction of the new club house, which coincided with the fiftieth anniversary of the Club (founded 1876), referred to the new architectural context of the neighborhood by employing style without ostentation, classical proportion, and traditional ornament executed in masonry. The use of the Doric order gave the building a grave, robust and masculine aspect, appropriate to a men's club house. (The design of the second floor windows was a variation of the one used by Inigo Jones at the Banqueting House in London).

The architectural firm of Guilbert and Betelle, founded in 1916, was known primarily for educational/institutional structures in the Middle Atlantic states. Among its more notable works in Newark are the Robert Treat Hotel, Chamber of Commerce Building, Newark School of Fine and Industrial Art (Arts High), Essex County Hall of Records and the North Ward National Bank (Architectural Record, February 1931, xeroxed reprint: n.p.). Other projects include State Teachers Colleges at Jersey City, Glassboro, and the New Jersey State Reformatory for Boys in Annandale and the Third State Hospital for the Insane, Hillsdale, New Jersey (Newark Evening News, June 6, 1952). The firm also designed 125 schools in Delaware, and high schools in Greenwich, Connecticut, Great Neck, New Rochelle, Tarrytown and Tuxedo Park, New York (Architectural Record, February 1931).

The Essex Club was the social pace setter of the day and was the initial sponsor of the annual Assembly Ball, the most brilliant affair of Newark's social season (Cunningham 1966: 242). The club house provided a gathering place for Essex County's most successful and prominent businessmen. The roll of the founding members of the Club reads like a veritable "Who's Who" on Newark and New Jersey history and includes such prominent men as Peter, John and Robert Ballantine, of the brewery fame; Thomas B. Peddie, benefactor of the Peddie Memorial Baptist Church; Edward Weston, electrical inventor

National Park Service

National Register of Historic Places
Continuation Sheet

Section number 8 Page 3

Essex Club, Newark, Essex County, NJ

and founder of Weston Electrical Instruments; Frederick T. Frelinghuysen, attorney general of New Jersey during the Civil War years and his son Frederick, president of the Mutual Benefit Life Insurance Company; William Clark of Clark Thread Works; Franklin Murphy, governor of New Jersey; Moses Bigelow, Sylvester S. Battin, Stephen J. Meeker, Anthony, Edward and George Keasby, Thomas T. Kinney, Cortlandt Parker, Worthington Pinney, Robert B. Symington, Eugene Vanderpool and Henry Young among others (Certificate of Incorporation, March 19, 1881).

The founding president of the club was A. Pennington Whitehead, who served in this capacity until he was replaced in 1895 by W. Frederick Frelinghuysen. Other presidents include:

1913 - John R. Hardin	1972 - Francis E. P. McCarter
1946 - Ludolph H. Conklin	1975 - Rodney N. Houghton
1946 - W. Clark Symington	1981 - John R. Thornton
1950 - John R. Hardin, Jr.	1983 - Christopher M. Wiedenmayer
1962 - S. Harrison Rollinson	1985 - William F. Tompkins
1968 - Walter M. Krementz, Jr.	1989 - Edward N. Lippincott

The club continues to serve the business community to this day.
