

Dr. F. Karaa

Fall 2025

CE 210-003: CONSTRUCTION MATERIALS & PROCEDURES

Class Hours

Mon Wed 10:00 AM- 11:20 AM - GITC 1400 (First Day of Classes September 3, 2025)

Office Hours (Office or Virtual)

Mon 12:15 PM- 1:45 PM and Wed 12:15 PM- 1:45 PM or by e-mail or phone appointment at (973) 642-4198 or karaa@njit.edu

REQUIRED TEXT

Halpin, Daniel W. and Senior, Bolivar A., Construction Management, 5th Edition Wiley, and ISBN: 9781119256809. This textbook is referred to as DH in the lecture readings and other references below.

OTHER REFERENCE

Other files are assigned electronically as supplemental readings and will be e-mailed to class participants. These are denoted in course outline as Efiles.

Prerequisite: HUM 101. Introduction to construction management organization, contracts, construction safety, engineering economics, and engineering ethics. Studies current practices of heavy construction including soil and rock excavation productivity, and building construction materials and procedures. Field trips to construction sites provide opportunities to directly view many of the practices.

“Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

<http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. **Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university.** If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

COURSE DESCRIPTION AND OBJECTIVES:

This course is a general comprehensive course on construction management and engineering in the Civil and Environmental Engineering Department at NJIT. It provides a broad understanding of the construction environment, the engineering and construction project management process and development process, with particular emphasis on planning, scheduling and cost management, which are key pillars of successful construction management. Also, the various tools and techniques and their interactions in the cost-effective development of constructed facilities, will be covered with practical illustrations and complemented by hands-on exercises and case studies.

LEARNING OUTCOMES

This course covers the environment, planning and management issues related to the modern approach of construction management. Using the cases and background materials, and methodologies covered, you should be able to:

- Analyze the feasibility of a construction project within resource constraints.
- Understand the basic structure of the construction industry, its environment, its various sectors and its overall relationship to the US and global economy.
- Devise the best organizational structure capable of carrying out the project.
- Understand engineering economic principles and apply the concepts of life-cycle management of a constructed project from the owner's perspective (feasibility, financing, rate of return, contract management, quality control).
- Define the role of the general contractor, and understand the perspective of the GC as a business (estimating, bidding, project financing, cash flow management, materials and operations management).
- Understand the components of modern Professional Construction Management, and its relationships to other project participants as a form of project delivery.

COURSE OUTLINE (Subject to updating throughout semester)

Week	Dates	Textbook/Reading	Assignment (*)	Topics
1	3 Sep	DH Chapter 1,2	As posted in Canvas	History and Basic Concepts of Construction; Bid Package Development
2	8, 10 Sep	DH Ch. 2 (ctd.), 3, 4	As posted in Canvas	Development Cycle for Projects (ctd.), Contracts
3	15, 17 Sep	DH Ch 5, 6		Alternative Project Delivery Systems/ Legal Aspects/ Taxes
4	22 Sep, 24 Sep	Chapter 6(ctd), E-File	As posted in Canvas	Impact of Taxes/Depreciation of Assets- Project Organization Structures
5	29 Sep, 1 Oct	DH Ch 7; DH Ch 8	MS project WBS Model	Project Planning WBS); Project Scheduling (1)
6	6 Oct, 8 Oct	DH Ch 8 (ctd.);	Problem 8.2, Bonus Assignment figure 8.26 MS Project generalized relationships	Quiz 1/ Project Scheduling (2);
7	13 Oct, 15 Oct	DH Ch 10	Resource Leveling and Time-Cost Trade-Off problems	Resource-Related and Linear Scheduling; Computer applications
8	20 Oct, 22 Oct	DH Ch 9	PERT Problem	Construction Materials (Part I)/ PERT Advanced Scheduling
9	27 Oct, 29 Oct	DH Ch 11	Future and Present Values; Lifecycle costing	Mid-Term/ Present and Future Values; Lifecycle Costing;
10	3, 5 Nov	DH Ch13	Problem Project Funding	Project Funding
11	10, 12 Nov	DH Ch 13 (ctd.)		Project Funding Case
12	17, 19 Nov	Handout, Dh Ch. 19;	TBA	Construction Materials and

				Properties (Part 2); Building Systems**
12	24 Nov	Engineering Ethics Handouts and Case	Ethics Assignment I	Engineering Code of Ethics – Knowledge and Case
13	1 Dec, 3 Dec	DH Ch 17, Ch 14	Problem: Equipment Balance Planning Ethics Case	Overview of Cost Estimating; Productivity Based Estimating ; Equipment Ownership Costs, Spread; Construction labor, safety
14	8, 10 Dec	DH Ch 15		Equipment Productivity – Heavy Construction, Review
15	14 December	Finals Start		

Final Exam Period: December 14-20.

*Actual Assignments may differ from list and can be changed by Instructor during Semester.

GRADING:

The overall term grade will be based on the following elements:

Paper/Project Case Study: 17.5%

Quiz 1: 10%

Homework: 20%

Class Participation/attendance: 10%

Mid-Term: 17.5%

Final: 25%

Field Trip Reports

Each student will submit two (2) reports, which can be 2 Parts of the same project on self-conducted field trips according to the following schedule:

1. Project Administration: In this first part, you will establish for a construction project of your choice, or a section of the class field trip project:
 - a- The project background, scope, budget, staging and key milestones.
 - b- Understanding of the contract and project delivery system, relationships between parties, progress measurement/payment, change order management.
 - c- Description of the Construction Methods and Materials, and an engineering evaluation of a key project component (e.g. foundation design, etc.)
 - d- A Preliminary Work Breakdown Structure.

Part 1 is due October 22 at 5PM.

2. Project Planning, including:
 - a- A detailed Work Breakdown Structure for all building systems and work elements
 - b- A MS Project CPM Schedule integrated with a cost estimate to enable cost/schedule integration.

Part 2 is due Dec 8 at 5PM.

Outline and Content Elements for Each (Part of) the Field Trip Reports:

1. *Introduction:* Identify the project, its location and the type of construction. Give the dates of your visitation. Identify the Owner, Contractor, and Architect-Engineer.
2. *Field Investigation:* Describe the project in detail based on your field visitation. Report on the present stage of construction. Report on the labor, equipment, and materials on the job. Report on production rates. Report any discussions with personnel (see note below).
3. *Engineering Evaluation:* Present your own evaluation of the equipment, materials, and procedures being used on the project based on your knowledge from CE 210. Suggest alternatives that might improve job progress and efficiency. Discuss any environmental and safety aspects of the project.
4. *Appendix:* (If any) Present applicable codes, manufacturer's literature, news articles, web links, etc.
5. *Figures and Photographs:* These or sketches are strongly recommended. Refer to all figures and photos in the body of the report.

Note: Make certain that you do not disrupt the ongoing construction activities during your visit. Always check first with the person-in-charge, usually the project superintendent, upon your arrival. Be courteous and remember, construction managers are busy people.

Report Format and Grading: The report should be word processed on 8.5 x 11 in. bond paper and electronic file submitted on Canvas. Correct grammar and spelling are required. Grading will be based on (1) Technical content, (2) Communication effectiveness including organization, grammar, spelling, clarity, and neatness. Suggested length of the text portion of each of the 2 Parts of the report is at least 4 pages.

AI statement: The use of artificial intelligence (AI) is permitted in this course only when explicitly stated in assignments. If students use AI for any course-related work, they must cite it according to the guidelines provided on the [NJIT Library AI Citation page](#). If you have any questions about AI use in this course, please contact the course instructor before submitting any assignments. In cases where AI use is not allowed, students are expected to complete work without AI assistance to develop their skills in this subject area.

Outcomes Course Matrix – CE 210-003 Construction Materials & Procedures

Strategies and Actions and Assignments	ABET Student Outcomes (1-7)	Program Educational Objectives	Assessment Measures
Student Learning Outcome 1: Explain terms used to describe construction materials, methods and procedures used in heavy building construction management and construction management and organization.			
Introduce the United States system of delivery of engineering and construction services	4	1, 2, 3	Homework, quizzes and exams
Introducing equipment labor and methods used in heavy and building construction	7	1	Homework, quizzes and exams
Student Learning Outcome 2: Apply the process of job planning, scheduling and construction productivity estimating.			
Introducing critical path method scheduling	1, 2	1	Homework, quizzes and exams
Introducing methods used to calculate and estimate excavation equipment productivity	1, 2	1	Homework, quizzes and exams
Student Learning Outcome 3: Discuss construction contracts in the context of the United States legal system.			
Introduce the United States legal system and contracts	4	1, 3	Homework, quizzes and exams
Present the NCEES model rules of professional conduct	4	1, 3	Homework, quizzes and exams
Introducing the role of OSHA and construction site safety	4	1, 2, 3	Homework, quizzes and exams
Student Learning Outcome 4: Observe and report on construction project site visits.			
Visit construction sites and observe the project status and operations at the site.	3	1, 2	Field reports.
Introducing Engineering Economics and its role in selection of alternatives.	7	1, 2	Homework, quizzes and exams.

CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarships among our faculty and students
- to promote service to the engineering profession and society

Program Educational Objectives

Our **Program Educational Objectives** are reflected in the achievements of our recent alumni:

1. **Engineering Practice:** Alumni will successfully engage in the ethical practice of civil engineering within industry, government, and private practice, working towards safe, practical, resilient and sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.
2. **Professional Growth:** Alumni will advance their technical and interpersonal skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as academia, business, and law through further education.
3. **Service:** Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Student Outcomes

Our **Student Outcomes** are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusion
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
