New Jersey Institute of Technology

CS288 - Intensive Programming in Linux

Course Syllabus Spring - 2025

Instructor: Mohit Dale Office: GITC 4406 Office Phone: (973)-596-2655 Office hours: Wednesday 2:30 PM to 3:30 PM AND Friday 4:00 PM to 6:00 PM (In Person) E-mail: mohit.dale@njit.edu (or) md685@njit.edu (Include section CS288-XXX in email subject) Class TA/Grader: TBD

Class Meetings:

CS288-002: Wednesday and Friday: 8:30 AM to 9:50 AM- Location: KUPF 209 CS288-004: Wednesday and Friday: 10:00 AM to 11:20 AM- Location: CULM LECT I CS288-006: Wednesday and Friday: 1:00 PM to 2:20 PM- Location: CULM LECT I CS288-008: Tuesday and Friday: 2:30 PM to 3:50 PM- Location: CULM LECT I CS288-102: Tuesday: 6:00 PM to 8:50 PM- Location: KUPF 209

Course Description:

This comprehensive program is designed to provide students with a strong foundation in programming concepts and practical skills within the Linux environment. Over the duration of the course, we will cover a wide range of topics such as Bash, C programming, and Linux system API; methods and algorithms for processing web data, such as searching trees and matrix computing; end-to-end applications such as one that constantly presents top 100 stocks; and extending the applications to run on multiple machines to equip you with the necessary tools and knowledge to become proficient in the Linux environment.

Course Outcome:

Upon completion of the course, students will be able to:

- Have a solid understanding of the Linux command line interface and be able to navigate, manipulate files, and execute commands efficiently.

- bash scripting, enabling you to automate tasks and create powerful scripts.
- Be proficient in using regular expressions, a fundamental skill for pattern matching and text processing in Linux.
- Gain the ability to debug C programs effectively, employing various debugging techniques to identify and fix issues in your code.
- Understand the binary representation of data and be able to perform bitwise operations, enabling you to work with binary data efficiently.
- Learn radix-sort, a powerful sorting algorithm, and apply it to efficiently sort.
- C pointers and dynamic multi-dimensional arrays, essential for managing memory and manipulating complex data structures.
- Explore self-referential structures and linked lists, fundamental concepts in data structures and algorithms, and gain the ability to implement them in C.
- Acquire knowledge and skills in A* search, a widely used algorithm for pathfinding and problem-solving.
- Develop proficiency in Linux file operations and directory operations, allowing you to create, modify, and manage files and directories programmatically.
- Learn how to write programs with multiple threads, enabling you to leverage parallelism and concurrency in your applications and parallel computing with MPI (Message Passing Interface), a powerful framework for developing high-performance parallel applications.
- Explore web scraping, learning how to extract data from websites programmatically and utilize it.

Prerequisites:

- CS 100 Roadmap to Computing
- CS 280 Programming Language Concepts
- We will be using the C programming language in this Course, you need to know how to write C programs.
- Additionally, this Course is all about Linux Systems, you will be using Linux CLI (Command Line Interface).

Course Material:

We will use powerpoint slides and a collection of papers/ articles / blogs for our class. All the course materials will be available on canvas after the Lectures.

Recommended Book:

The C Programming Language, Kernighan and Ritchie, Prentice Hall, 2nd edition, ISBN: 978-0131103627.

NJIT policy on recording class materials:

Recording any lecture material, including audio, video or taking photos in class is not permitted. Additionally, posting any class materials (slides, resources etc) on the internet is strictly prohibited, as it violates the University's intellectual property policy.

Communication:

This course uses Canvas for announcements and discussion. If you have questions about the class materials or assignments, requests for clarification, or other issues that may interest the class as a whole, post them to the Discussion Forum in Canvas.

If you have any further questions that you are confident do not belong on Canvas, drop me an email and I will respond within 24 hours (use NJIT email).

Grading Policy:

Homeworks	18%
5 Quizzes	25% (Each Quiz for 5%)
Midterm	25%
Final	30%
Attendance	2%
Total	100%

*Active class participation is Necessary.

Homeworks:

Homeworks will have several tasks where code needs to be completed. Each Homework will have its own detailed instructions. In addition, own research on the details of the implementation needs to be conducted. Each Homework will be given a week time to be completed and submitted via Canvas. Homework will not be accepted after the due date (More details on Homeworks will be given in the future).

Exams:

All Exams including mid-term and final will be closed book, failure to attend the exam will result in zero for that particular exam and there will be NO make up exams if you miss.

Most Exam questions will be derived from Homeworks problems. Do your homework from scratch and on your own.

Late Policy

Homework due date will be provided for each on canvas and students are expected to submit on the day of due date, failing to submit before the due date will result in a grade of zero. No Exceptions will be made unless the student provides documentation from the Dean of Students.

Grade	Significance
85-100	A (Excellent)
75-84	B+ (Very Good)
65-74	B (Good)
60-64	C+ (Acceptable)
56-59	C (Marginal Performance)
51-55	D (Minimal Performance)
50 and below	(F) Fail

Grading Scale:

*Note: There is no Curve, the class expects you to strive for a better grade, so don't expect a curve.

Grade Corrections

Check the grades in course work and report errors promptly. Please try and resolve any issue within one week of the grade notification.

NJIT Honor Code:

Any evidence of cheating in any form, including plagiarism, Submitting other student Homeworks, using AI etc, will be dealt with according to the honor code of NJIT (course failure and suspension or expulsion). Please note: There will be no warnings or chances with regard to cheating. Any discovered case of cheating will be immediately passed to the Dean of Students for further investigation. Cheating is not worth it. You may not only fail this course but also be suspended from NJIT. The full text of the NJIT Honor Code is available for your review at: <u>https://www5.njit.edu/policies/sites/policies/files/NJIT-University-Policy-on-Academic-Integrity.pdf</u> A set of ethical principles governing this course:

- It is okay to share information and knowledge with your colleagues/classmates, but
- <u>It is NOT okay</u> to share the code,
- <u>It is NOT okay</u> to post or give out your code to others (also in the future!),
- <u>It is NOT okay</u> to use code from others for Homework!

Course Schedule: -

* Note: <u>The course outline and content are Subject to modification.</u>

The syllabus is divided into **3** stages.

Week	Topics	Quiz Dates
	Stage - 1	
1	 Presentation- Course Introduction Presentation- Introduction to Linux Environment (CLI) 	
2	Presentation- Bash Shell Scripting	
3	• Presentation- Bash Shell Scripting (Continuation)	
4	• Presentation - Pattern Matching with Regular Expressions	Quiz - 1
	Stage - 2	
5	 Presentation- Debugging in C (GDB Tutorial) (3.1~3.2) Presentation- Binary representation of data (4.7, 4.3, 4.8) Presentation- Bitwise operators (4.6) 	
6	• Presentation- Radix-sort	Quiz-2
7	• Presentation - C Pointer variables and Memory Addresses (2.1~2.6, 2.9.2~2.9.4)	
8	• Presentation - C Pointer variables (Pointer to Pointer) and (Dynamic) multidimensional arrays, CommandLine Arguments (2.1~2.6, 2.9.2~2.9.4)	
9	• Spring Recess (No Class)	Quiz-3
	Stage - 3	
10	10 Midterm Exam	
11	 Presentation- Structures and Linked list (2.7) Presentation- A* Search and State Space Search 	

12	• Presentation - Programs with multiple threads (14.1~14.3)	Quiz-4
13	• Presentation - Parallel computing with MPI (15.2)	
14	Presentation- Web Scraping	
15	• Presentation - Web Scraping (Continuation)	Quiz-5
16	• Final Exams - See the registrar's page for final date (TBD)
