Course Syllabus - Spring 2024 DS 636: Data Analytics with R Programming

Instructor: Dr. Yajuan Li Email: yajuan.li@njit.edu

Office: GITC 4309

Office Hours: Monday 4:00-5:30 pm (Office), Friday 10:00-10:30 am (Webex)

Course Description and Format:

This course will teach how to program in R and how to use R for effective data analysis. The students will learn basic analytic skills via this high-level analytical language. The course covers fundamental knowledge in R programming. Popular R packages for data science will be introduced as working examples. When you have completed this course, you should be familiar with R programming and use it to analyze/solve real data science problems.

Prerequisite: Some basic knowledge of programming, probability, and statistics. If in doubt about the prerequisites, please consult with the instructor for permission to take the class.

Textbooks:

- R Programming for Data Science, by Roger D. Peng, https://leanpub.com/rprogramming
- An Introduction to Statistical Learning with Applications in R, by Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani
- Using R for Introductory Statistics, by John Verzani, Chapman & Hall/CRC, 2004, ISBN 1584884509
- Advanced R, by Hadley Wickham, ISBN 9781466586963 https://adv-r.hadley.nz/

Attendance: You are supposed to attend all the classes. Participation is highly encouraged to make the class more interactive. In general, students who attend class regularly perform much better than those who come only occasionally. If you miss one class, be sure to consult one of your classmates about the content of the lecture and use canvas to get notes, exercises, assignments, deadlines, and announcements.

Late Policies

(1) Late submissions for homework and project will be accepted but will be penalized.

Days Late (x)	Penalty (percentage off the full grade)
0 < x < = 1	25%
1 <x<=2< th=""><th>50%</th></x<=2<>	50%
2 <x<=3< th=""><td>75%</td></x<=3<>	75%
x>3	100% (will not be accepted)

(2) Students can get extended deadline only if they have special/emergency reasons verified from Dean of students. https://www.njit.edu/dos/student-excusals

There will be NO EXCEPTION to these late policies. Please manage your time appropriately.

Exam Policies

There will be one midterm and one final exam. Be sure that you will be present for all of your exams. Respondus LockDown Brower and Monitor can be used to monitor and proctor the test. All students are required to have a working webcam in order to take the exam. More

information about Respondus Lockdown Browser can be found at https://web.respondus.com/student-help/

You must bring a student ID to all exams. There are no late submission or makeup for exams. Students who have special/emergency reasons to reschedule exams must apply and get approval of testing accommodation from the Office of Accessibility Resources and Services. https://www.njit.edu/accessibility/requesting-testing-accommodations

Course Grade:

- Homework (15%)
- Project (15%)
- Midterm Exam (35%)
- Final Exam (35%)

Grading Scale:

Grade	A	B+	В	C+	С	F
Overall Course Score	≥ 93	[86,93)	[78,86)	[70,78)	[60,70)	< 60

^{*}Final grade will not be curved unless necessary.

Tentative Course Topics (Subject to changes according to progress)

Week | Topic

1 Introduction: overview of class, getting started with R 2 R Nuts and Bolts 3 Getting Data In and Out of R 4 Control Structures and Functions 5 Loop Functions and String Operations 6 Data Manipulation 7 Probability Basics & Data Exploration 8 Midterm Exam 9 Probability distributions 10 Regression and Classification 11 SVM and other Representative Classifiers 12 Clustering 13 R Debugging; Project Presentation 14 Review 15 Final Exam	Week	Topic
Getting Data In and Out of R Control Structures and Functions Loop Functions and String Operations Data Manipulation Probability Basics & Data Exploration Midterm Exam Probability distributions Regression and Classification SVM and other Representative Classifiers Clustering Review	1	Introduction: overview of class, getting started with R

13 R Debugging; Project Presentation 14 Review	11	SVM and other Representative Classifiers
14 Review	12	Clustering
	13	R Debugging; Project Presentation
15 Final Exam	14	Review
	15	Final Exam

Collaboration and Honor Code

Each student is responsible for his/her own work. Students may discuss problems together but must write up their own solutions. When writing up the solutions, students should write the names of people, if any, with whom they discussed the assignment. Note that copying homework or programming assignments, in full or in part is forbidden. Students found cheating or plagiarizing will be immediately referred to the Dean of Students and the NJIT Committee on Professional Conduct and subject to Disciplinary Probation, a permanent marking on the record, possible dismissal, and an "F" grade in the course. All submitted assignments will be checked for similarities, and plagiarism and guilty students identified. In the exam, each student is required to sign the Honor Code Agreement "On my honor, I pledge that I have not violated the provision of the NJIT Student Honor Code."

University Policy on Academic Integrity

"Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu"

^{*}Students will be notified in class of any changes to the syllabus.
