Course Outcomes

On successful completion of this course, the student will be able to:

- Explain basic financial derivative contracts: forwards, futures, options and swaps.
- Perform payoff and profit calculations for financial derivatives.
- Demonstrate hedging strategies using financial derivatives.
- Apply the techniques to practical problems.

Course Assessment: Assessment of objectives is achieved through homework assignments, projects, and a comprehensive final exam.

POLICIES

DMS Course Policies: All DMS students must familiarize themselves with, and adhere to, the **Department of Mathematical Sciences Course Policies**, in addition to official **university-wide policies**. DMS takes these policies very seriously and enforces them strictly.

Grading Policy: The final grade in this course will be determined as follows:

Homework	25%
Projects	25%
Midterm Exam	25%
Final Exam	25%

Attendance Policy: Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the **Math Department's Attendance Policy**. This policy will be strictly enforced.
