INT 321 Methods & Materials

INSTRUCTOR: David Brothers / 681 Weston / dabrothers@gmail.com / brothers@njit.edu /

Office hours: Wednesday 11.30-12.30 / Thursday 10-11.30

COURSE STRUCTURE: Monday 10.00-11.20 & Wednesday 10.00-11.20 Credits - 3 NOTE: For the Fall 2024 semester, this course will operate in-person unless there are revised guidelines established by the University.

Class time will be divided between lectures, discussions, in-class assignments and reviews. All course material and correspondence will be conducted through the Canvas course management system. Work will be expected outside of required class time based upon assignment expectations. All students are expected to complete required reading, participate in class discussions and to initiate ideas and effort beyond the minimum requirements.

COURSE DESCRIPTION: The study of materials, products, and assemblies used in interior design. The course covers code requirements and life safety, specification, installation, performance of materials (including fabrics and textiles), and sustainability of material selection and utilization. The impacts of materials utilization on health and interior environmental quality are also covered.

PREREQUISITES: <u>AD 111</u>, <u>AD 112</u>, <u>AD 150</u> or <u>ARCH 334</u>, <u>AD 161, AD 162</u> and <u>ARCH 251</u>

COURSE OBJECTIVES

At the completion of this course students will be able to:

- identify interior finish materials and products
- use selection criteria (aesthetics, cost, durability, maintenance, limitations of material sizes & finishes, typical installation methods, code-related issues, delivery lead time and sustainable issues) to inform decision making about material choices.
- draw typical finish details
- identify the various codes impacting the specification of interior finish materials.
- use industry-typical research methods to identify materials sources

CIDA LEARNING & COMPETENCY OBJECTIVES

The Council for Interior Design Accreditation accredits NJIT's interiors program. CIDA has 16 Standards, consisting of 79 subcategories, which must be covered by any curriculum to attain approval. This course satisfies (all or in part) the following criteria:

- **13a.** Students are aware of the influence of furnishings, objects, materials, and finishes on human and environmental wellbeing.
- **13b.** Student work demonstrates understanding of how furnishings, objects, materials, and finishes work together to support the design intent.
- **13c.** Student work demonstrates understanding of typical fabrication, installation methods, and maintenance requirements.
- **13d.** Student work demonstrates understanding of appropriate design or specification of products and materials in relation to project criteria and human and environmental wellbeing.
- 14b. Students understand the principles of acoustical design.
- **14c**. Students understand appropriate strategies for acoustical control.

14g. Students understand how the selection and application of products and systems impact indoor air quality.

15c. Student work demonstrates understanding that design solutions affect and are impacted by interior systems, construction, and installation methods.

15d. Student work demonstrates understanding that design solutions affect and are impacted by detailing and specification of interior construction materials, products, and finishes

16b. Student work demonstrates understanding of standards and guidelines related to sustainability and wellness

16c. Student work demonstrates understanding of sector-specific regulations and guidelines related to construction, products, and materials.

CLASS GUIDELINES

1 ATTENDANCE: You are expected to attend every class unless there is an acceptable excuse (see below). You are expected to be present in class for the entire duration of the class meeting time whether synchronously online or face-to-face in a converged learning environment. If you arrive late or leave early without prior approval of your instructor you will be considered absent. If you miss a class, you are responsible for the material and directions covered. The NJIT attendance policy is as follows: After three absences students may be docked one-half grade for each subsequent unexcused absence. (i.e., if the final grade would have been an 'A', it results in a 'B+'. A 'B+' becomes a 'B' and so on. There is a one-half grade penalty for EACH absence after the third) and students will not be permitted to return to class without permission from both the instructor and class coordinator. Additionally, one absence will be recorded for every three late arrivals to class.

A late arrival is defined as arriving to class 5 minutes or more after the start. NOTE: *Anyone arriving after 15 minutes from the start of class will be marked absent.*

NOTE: All excused absences MUST be documented through the Dean of Students.

Acceptable Absences:

Documented Illness or Unavoidable Circumstance

The only accepted documentation is notification from the Dean of Students. Your instructor will not accept notes from doctors directly. Students must present appropriate documentation to the Dean of Students within two lectures of returning.

Religious Observation

Students must inform their instructor *prior* to class that they will miss a session (or more) due to religious observance. Students are permitted to observe religious holidays of one *and only one* religion per semester.

- 2 ASSIGNED WORK: Work is due as scheduled on the Syllabus or assigned by your instructor. Late work will be accepted at the discretion of the instructor but will be dropped in grade.
- 3 EXAMS: Students must sit for all exams in order to receive credit for the class. Only excused absences *before* the exam is to take place will be considered for make-up at a later date.
- 4 DIGITAL TECHNOLOGY: *Cell phones and all PDA devices* are not permitted to be used in class to send or receive messages. If your phone disturbs the class, you may be asked to leave and assigned an absence for that day.

Laptop computers are to be used exclusively for note taking and CAD. Under no circumstances are students permitted to use email, instant messaging, web surfing, or video/audio streaming during class unless expressly authorized by the instructor for the purpose of specific classroom instruction.

5 ARTIFICIAL INTELLIGENCE: Student use of artificial intelligence (AI) in this course is only permitted for specific assignments that will be clearly articulated by your instructor for when and how it is to be utilized. Additionally, if and when students use AI in this course, the AI must be cited as is shown within the NJIT Library AI citation page: https://researchguides.njit.edu/AI/home

6 STUDENT ACCOMMODATIONS

All reasonable efforts will be made to accommodate a student with a temporary disability (e.g., broken arm, protracted illness, etc.) as long as the student is responsible for communicating with their instructor about the issue and for cooperating in its resolution. Students with more permanent physical or learning disabilities must provide documented requests for accommodation to their instructor at the beginning of the semester (or as soon as the disability is diagnosed and documented). Students should contact the Disability Office

(http://www.njit.edu/counseling/services/disabilities.php) for further information and instruction for obtaining medical and/or psychological disability documentation.

ACADEMIC CONDUCT & INTEGRITY

"Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu"

GRADES

Your grade for the semester will be based on the following assessments/assignments:

Reading/Lecture Quizzes	5%
Lab/Homework Projects	15%
PROJECT 1 (Millwork)	15%
PROJECT 2 (Material Maquette)	15%
EXAM 1 (Mid-term)	25%
EXAM 2 (Final)	25%

Reading/lecture Comprehension quizzes are given at the start of class throughout the semester. If you do the assigned reading in advance of the class, you should do well on these quizzes. They are intended to be relatively easy, but they are sometimes based on material that we will not yet have discussed in class and may be unfamiliar to you. Therefore, it is important to come prepared. If you miss a class when there is a Reading Comprehension Quiz and you do not have an excused absence you will receive a zero (0) for the quiz. This will greatly influence your cumulative Reading Comprehension Quiz average grade – make sure you come to class on time!

GRADING CRITERIA

The Institute guidelines for grading are as follows. These guidelines will be used by your instructor to evaluate your work. Please familiarize yourself with these standards and discuss any questions with your instructor.

A	Superlative	(93-100)	Student learning and accomplishment far exceeds published objectives for the course/test/assignment and student work is distinguished consistently by its high level of competency and/or innovation
B+ B	Excellent Very Good	(87-92) (80-86)	Student learning and accomplishment goes beyond what is expected in the published objectives for the course/test/assignment and student work is Frequently characterized by its special depth of understanding, development and/or innovative experimentation
C+ C	Good Acceptable	(75-79) (69-74)	Student learning and accomplishment meets all published objectives for the course/test/assignment and student work demonstrates the expected level of understanding and application of concepts introduced
D	Minimum	(60-68)	Student learning and accomplishment based on the published objectives for the course/project/test were met with minimum passing achievement
F	Inadequate	(<60)	Student learning and accomplishment based on the published objectives
