

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MNET 300 Concepts in Machining**

<b>COURSE NUMBER</b>	MNET 300
<b>COURSE NAME</b>	Concepts in Machining
<b>COURSE STRUCTURE</b>	2-2-3 (lecture hr/wk - lab hr/wk – course credits)
<b>COURSE COORDINATOR/ INSTRUCTOR</b>	Dr. S. Lieber/ Blaine Edlefsen
<b>COURSE DESCRIPTION</b>	Applications in the machining of various materials. Topics include speeds and feeds calculations, tooling concepts, gaging techniques and prototype construction.
<b>PREREQUISITE(S)</b>	MET 103
<b>COREQUISITE(S)</b>	None
<b>REQUIRED, ELECTIVE OR SELECTED ELECTIVE</b>	Elective
<b>MATERIALS</b>	<b>Required Materials:</b>  Precision Machining Technology 3rd Edition by Peter J. Hoffman , Eric S. Hopewell ISBN-13: 9781337795302
	<b>Reference Materials:</b> Print Reading for Engineering and Manufacturing Technology 3 <sup>rd</sup> Edition by David A. Madsen. ISBN-13: 9781133716570
	<b>Access Engineering:</b> Design for Manufacturability Handbook, 2nd Edition, James Bralla
	Geometric Dimensioning and Tolerancing for Mechanical Design, 3rd Edition, Gene R. Cogorno
	Handbook of Machining and Metalworking Calculations, 1st Edition, Ronald A. Walsh
	Materials and Manufacturing: An Introduction to How They Work and Why It Matters, 1st Edition, Mark A. Atwater, Ph.D.
<b>COMPUTER USAGE</b>	Software: Microsoft Office, CAD Software.

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MNET 300 Concepts in Machining**

<b>COURSE OUTCOMES(CO)</b>	By the end of the course students should be able to: <ol style="list-style-type: none"><li>1. Define diverse manufacturing and inspection processes.</li><li>2. Describe engineering drawings and how their interpretation relates to the selection of different manufacturing and inspection processes.</li><li>3. Analyze engineering drawings towards the selection of manufacturing and inspection processes.</li><li>4. Apply knowledge of manufacturing /inspection process for fabrication planning with different materials.</li><li>5. Apply knowledge of manufacturing /inspection process for fabrication calculation with different materials.</li><li>6. Apply knowledge of manufacturing and inspection processes towards fabrication.</li><li>7. Prepare engineering documents/reports.</li></ol>
<b>CLASS TOPICS</b>	Engineering Drawing Analysis, Geometric Dimensioning and Tolerancing (GD&T), Materials, Fabrication Planning, Fabrication Calculation, Fabrication, Hand Tools, Saws, Drilling/Reaming/Threading, Milling Operations, Turning Operations, Toolholding, Workholding, Inspection Methods, Assembly, Fabrication.
<b>STUDENT OUTCOMES</b>	The Course Learning Outcomes support the achievement of the following MET Student Outcomes and TAC of ABET Criterion 9 requirements:  <b>Student Outcome 1</b> - an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline; <b>Related CO – 1-7</b>  <b>Student Outcome 2</b> - an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline; <b>Related CO – 3-6</b>  <b>Student Outcome 3</b> - an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature; <b>Related CO – 7</b>

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MNET 300 Concepts in Machining**

<b>GRADING POLICY</b>	Homework	10 %
	Lab Reports	25 %
Note: Grading Policy may be modified by Instructor for each Section in the Course)	Lab Assignments	15 %
	Three Quizzes	20 %
	Final Exam	30 %
	There are three quizzes during the semester. The lowest grade will be dropped. However, if you achieve an A for all three quizzes, you will not be excused from the final. There will be no makeup tests – if you miss one test, then that is the test you will drop.	
<b>ACADEMIC INTEGRITY</b>	NJIT has a zero-tolerance policy regarding cheating of any kind and student behavior that is disruptive to a learning environment. Any incidents will be immediately reported to the Dean of Students. In the cases the Honor Code violations are detected, the punishments range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT with notations on students' permanent record. Avoid situations where honorable behavior could be misinterpreted. For more information on the honor code, go to <a href="http://www.njit.edu/academics/honorcode.php">http://www.njit.edu/academics/honorcode.php</a>	
<b>STUDENT BEHAVIOR</b>	<ul style="list-style-type: none"><li>• No eating or drinking is allowed at the lectures, recitations, workshops, and laboratories.</li><li>• Cellular phones must be turned off during the class hours – if you are expecting an emergency call, leave it on vibrate.</li><li>• No headphones can be worn in class, unless allowed by the professor.</li><li>• Unless the professor allows the use during lecture, laptops should be closed during lecture.</li><li>• During laboratory, if you are finished earlier, you must show the professor your work before you leave class</li><li>• Class time should be participative. You should try to be part of a discussion</li></ul>	
<b>MODIFICATION TO COURSE</b>	The Course Outline may be modified at the discretion of the instructor or in the event of extenuating circumstances. Students will be notified in class of any changes to the Course outline.	
<b>PREPARED BY</b>	Blaine Edlefsen	

**New Jersey Institute of Technology**  
**Department of Engineering Technology**  
**MNET 300 Concepts in Machining**

**COURSE** Dr. S. Lieber

**COORDINATED BY**

**CLASS HOURS**

Monday 8:30– 10:35 AM GITC 2311

Wednesday 8:30– 10:35 AM GITC 2311

**OFFICE HOURS**

By appointment: blaine.edlefsen@njit.edu

**HOMEWORK, LAB ASSIGNMENTS - IMPORTANT**

1. Homework, Lab Assignments will be posted on the Learning Management System (LMS).
2. Homework and Lab Assignments are due as described in LMS. Late penalty is minus 25% each week. Assignments more than one week late will not be accepted.
3. Homework and Lab Assignments must be submitted in the format provided by the professor.
4. You need to be present and participate when the lab is conducted in order to receive credit for the related Lab Assignment. A Lab Assignment passing grade is required to pass the course.

**GRADING LEGEND**

<b>GRADE</b>	<b>NUMERIC RANGE</b>
A	90 to 100
B+	85 to 89
B	80 to 84
C+	75 to 79
C	70 to 74
D	60 to 69
F	0 to 59

**MNET 300 Concepts in Machining**

**GENERATIVE AI**

Student use of artificial intelligence (AI) is permitted in this course for certain assignments and activities. It is not permitted to be used in the assignments noted by the instructor, as doing so would undermine student learning and achievement of course learning outcomes. Additionally, if and when students use AI in this course, the AI must be cited as is shown within the [NJIT Library AI citation page](#) for AI. If you have any questions or concerns about AI technology use in this class, please reach out to your instructor prior to submitting any assignments.
