COURSE OUTCOMES (CO)	By the end of the course students should be able to: 1. Calculate industrial costs and benefits using a variety of techniques 2. Understand the importance of time-value of money in economic analyses and calculate its effects on investments and loans 3. Analyze realistic cost:benefit scenarios in typical industry problems 4. Evaluate economic alternatives considering the effects of depreciation and taxes 5. Parse complex real-world technical cost issues, identify and analyze cost reduction alternatives, and make an oral and written presentation to "management" 6. Demonstrated ability to read-ahead course materials in advance of class lecture, and report both key learnings and issues to instructor before class 7. Understand and practice how to recognize and analyze ethical issues
